

# ***ASPIRE***

As part of a project to improve the school environment members of the School Council, with support from Resourcefutures Ltd., have placed a stunning modern sculpture near the reception area.

This contemporary piece of art, designed by Iota Ltd of Wick St Lawrence and standing approximately 2 metres high, is constructed of vivid blue acrylic and mirrored stainless steel mounted on a polished granite base which was constructed by Mr Chris Taylor a teacher in our DT faculty.

The School Council have named the sculpture *ASPIRE* and they hope it will provide a focal point to both intrigue and encourage everyone who sees it to achieve their own goals and aspirations.
